Wet Mix Macadam

Details ▼

0+280 → 0+380 Measured: 56.25 CUM BOQ: 56.25 Cum

Equipment Log

Machine	Work	Usage	Diesel	Consumption	Notes
SOIL COMPACTOR TS08JG4572 Hired · Nafeez Monthly Operator: Ramesh	Wet Mix Macadam 7.4 h Compacting WMM lift	2,594.4 → 2,595.5 = 1.1 h	20.0 L tank 54.0 → 62.5 ✓	10.5 L/hr measured ✓ norm 9.0 L/hr ▲ 16%	AUDIT-STRESS Hydraulic inspection · 35 min Plant stock

Machine day: 1

Entry / hire type: monthly

Daily status: Working

Status reason: Saved fixture status reason

Breakdowns: 1

Opening / closing meter: 2594.4 / 2595.5

Start / end time: 9:50 AM / 5:13 PM

Clock duration: 7 h 23 min

Saved operating quantity: 1.100 h

Calculated preview quantity: 1.100 h

Usage basis: hour meter

Trips / one-way distance: — / — km

Diesel issued: 20.000 L

Opening / closing tank: 54.000 / 62.500 L

Physical tank balance: Confirmed

Saved expected diesel: 9.900 L

Fuel-summary expected: 9.900 L

Issued – saved expected: 10.100 L

Saved norm: 9.000 L/hr

Current master norm (reference): 9.000 L/hr

DPR snapshot consumed: 11.500 L

DPR snapshot consumed – expected variance: 1.600 L

Diesel source: Plant stock

Fuel station / bill / amount: — / — / —

Work assignments / segments:

🕒 WORK ASSIGNMENT

Wet Mix Macadam

9:50 AM → 5:13 PM

7 h 24 min

Assigned: 7 h 23 min **Unassigned: 0 min** Machine Day: 7 h 23 min

Saved segment links:

Segment 1 · 9:50 AM → 5:13 PM · saved 7.400 h

Machine	Work	Usage	Diesel	Consumption	Notes
Wet Mix Macadam 2:40 PM → 5:30 PM 2 h 48 min					
Assigned: 2 h 50 min Unassigned: 0 min Machine Day: 2 h 50 min Saved segment links: Segment 1 · 2:40 PM → 5:30 PM · saved 2.800 h BOQ #7 Breakdown / stoppage audit: —					

Total · 3 machines	5.600 h	0.000 km	42.000 L issued	25.800 L expected
16.200 L issued – expected				

Measured ✓ uses canonical confirmed performance when available, otherwise the confirmed DPR tank snapshot (opening + issued – closing). Issued uses diesel issued ÷ recorded usage; it can read high when the tank was topped up ahead. Vehicles use km/L. ✓ is within ±10% of norm; ▲ is more than 10% worse; amber check ▼ is more than 10% better — check diesel entries and readings. Clock duration and calculated previews are separate audit facts. Snapshot variance is consumed – expected; totals difference is issued – saved expected. Assignment validation uses machine-day clock duration; segments are clock times, and gaps and partial assignment are allowed. Meter working hours use opening/closing meter difference; vehicle distance uses odometer or recorded round trips.

Labour Strength

Category	Gender	Count	Hours	Task/Work	Contractor/Gang
Skilled	Male	1	8 h	WMM	Fixture gang
Unskilled	Male	1	7.5 h	-	-
